EXPERIENCE

Software Developer | *Seansoft Corporation*

Makati, Philippines | Jan 2024 – Apr 2026

- Developed and maintained [mineral.tech](#), a [mineral management platform](#) for managing mineral assets, GIS maps, reporting, documents, and related workflows.
- Migrated legacy AngularJS features to React, simplifying frontend architecture and making features easier to maintain.
- Resolved a Leaflet memory leak that caused maps with hundreds of thousands of markers to become unresponsive by profiling memory usage and properly cleaning up layers and object references when disabled.
- Built and optimized Django APIs for reports and product workflows, improving validation, filtering, and data handling.
- Improved slow reports and database operations by identifying query bottlenecks, adding targeted PostgreSQL indexes, and replacing expensive Django ORM queries with optimized raw SQL where appropriate.
- Migrated custom audit logging toward database-level auditing providing more consistent and reliable change tracking.
- Added and stabilized Cypress E2E tests around React migrations, helping catch regressions before release.
- Used Claude Code during the AngularJS-to-React migration to break large migrations into smaller implementation and testing tasks while reviewing and validating generated changes.
- Contributed to [CodeTest](#), improving workflows and UI consistency to make the platform simpler and smoother to use.

React Developer | *Binbooker*

Vancouver Canada (Remote) | Mar 2025 – July 2025

- Improved various parts of the [BinBooker](#) app using React and SCSS, mostly improving existing workflows and UI.
- Built advanced filtering and reporting features that made operational data easier to find, review, and analyze.
- Optimized Bins Management performance for large datasets by reducing unnecessary rendering and costly frontend work.
- Enhanced Stripe integration and added a system-wide maintenance mode for planned deployments or maintenance.

Full Stack Developer | *Evelan GmbH*

Hamburg, Germany (Remote) | Aug 2023 – Jan 2024

- Worked on [PAUL 360](#), a secure document collaboration platform built with Next.js, tRPC, TypeScript, and PostgreSQL.
- Built responsive, reusable, and type-safe UI components using React and Chakra UI.
- Built type-safe tRPC APIs with shared frontend contracts, reducing API/client and simplifying integration.
- Shared Zod schemas across client/server validation, reducing duplicated validation and keeping data rules consistent.
- Designed and updated PostgreSQL schemas with Prisma to support new application features and data requirements.
- Added Jest tests around core application logic to catch regressions as features changed.

Software Engineer | *Beyondr Inc.*

Makati, Philippines | Feb 2022 – July 2023

- Shipped multiple web and mobile products, including ([Kokuban](#) (MVP), [スマホ de マップ](#), [Doko?](#)), using TypeScript, Next.js, React, React Native/Expo, Node.js, MongoDB, Firebase, and Supabase
- Automated build and deployment workflows with GitHub Actions, reducing manual release work and deployments.
- Took ownership of frontend implementation across projects, keeping patterns consistent and reviewing developers' work.

Full Stack Developer | *Freelance*

Muntinlupa, Philippines | Sep 2021 – Feb 2022

- Built and maintained web and mobile applications for freelance clients, covering frontend and backend development.
- Worked with a small team including a senior engineer to build and deliver an e-commerce platform.

EDUCATION

Bachelor of Science in Information Technology | *STI College Alabang*

June 2019 – July 2023

TOOLS

- **Frontend:** JavaScript/TypeScript, React, Next.js, Tanstack Start, React Router, React Native, Tailwind CSS
- **Backend:** Node.js, Express, Python (Django), Hono (RPC), tRPC, Auth (better-auth), OpenAPI
- **Data:** PostgreSQL (Neon, Supabase), SQLite, MongoDB, Redis, Prisma, Drizzle
- **DevOps:** Vercel, Cloudflare, Github Actions (CI/CD)
- **Other technologies:** Turborepo, Firebase, Sanity CMS, Vercel AI SDK, Langfuse
- **Dev tools:** VS Code, Git, GitHub, Claude Code, Codex, OpenCode
